Savaria® K2 | Our compact and dependable straight stairlift

Colour

The style seat is supplied in a vanilla beige leather look upholstery, which is easy to clean and replace if required.

The nuts and bolts

Uniquely compact

Tidy when folded and compact when in use, the K2 is designed to fit neatly and discreetly on your stairs, leaving them accessible to others in the home. The standard swivel radius is only 645mm and an optional short armrest is available with a reduced swivel radius for homes where staircases are particularly narrow.

Trusted technology

The K2 is manufactured using a tried, tested and proven-through-years-of-service rack and pinion drive system, which is designed for robust reliability trip after trip; the exact traits you need when looking for a stairlift.

Quick to install

Easy and fast installation means you'll be able to safely access all floors in your home sooner than you'd think. It's not just the installation that's efficient but the design of the lift means servicing is simple too, thanks to the removeable covers.

Battery operated

Battery operated, the K2 provides long-lasting power with built-in charging at top and bottom landings. Always dependable, it can be used several times even during a power failure. The lift has been designed with extra-long charge contacts so that it charges even if the user stops before the end of the rail.

Wall-mounted, hand-held remote controls are supplied to use at the top and bottom of the stairs, so you can always call your lift up or down - helpful when more than one person in the home likes to use the stairlift.

Heavy duty capacity

Catering for up to 140kg as standard, the K2 is durable, sturdy and comfortable.

Ideal for steep staircases

With an inclination range of up to 55°, the K2 is perfectly primed for steep staircases.

Manual folding hinge

A manual folding hinge can be fitted if there is a doorway or hallway close to the bottom of the stairs so the track can be folded away, giving clear access.

Powder coated rail

The white powder coated rail blends seamlessly into your décor and preserves the performance of your lift.

Safety features

The LED diagnostic display will advise users of any issues. The lift seat will swivel and lock at the top landing for safe dismount and a retractable seatbelt, slip-resistant footrest and obstacle sensors come as standard.

Optional extras

Customise your K2 with options including powered seat swivel and powered folding footrest. Other extras include shorter armrests and a velcro seatbelt for users who struggle to operate retractable belts.

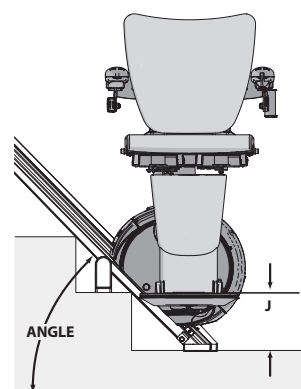

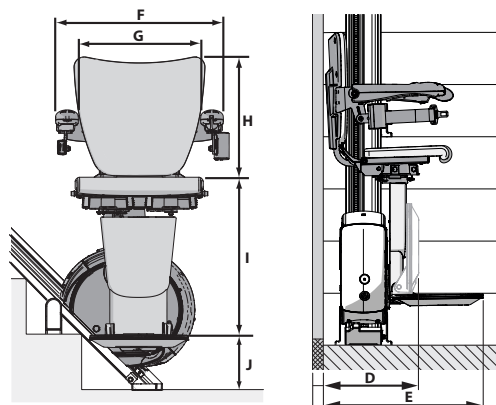

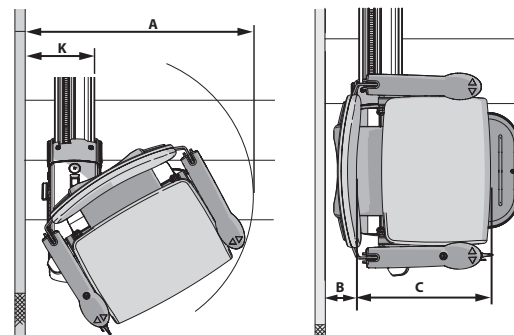

One Touch Alert

With the simple press of a button, you can dial your pre-programmed emergency contacts directly from your stairlift through the new Savaria One Touch Alert. A discreet yet invaluable feature that utilises two-way communication, the system connects you with assistance swiftly and reliably, if required.
